# Top Size Bulbs for Summer Flowers

All Bulbs on this page are sent prepaid Parcel Post with complete planting instructions.

## Vaughan's DeLuxe-Flowered Gladiolus

Gladiolus make attractive displays in the garden when planted in beds or in groups along the border, and they are ideal for cutting. Gladiolus are easily grown in any good, well-drained soil in a sunny location. They may be had in bloom continuously through the summer and fall months by planting a number of bulbs every week or so from early spring until July. Free from Thrips and other diseases.

The following are truly superb and proven varieties, which are extra fine in color and bear immense flowers, excellently placed on tall, upright spikes.

### FINE AND NEW SELECT VARIETIES

## Gladiolus

**Elizabeth The Queen.** Fine ruffled lavender.

**General Eisenhower.** Begonia rose.

**Hopman's Glory.** Yellow.

**Joe Wagenaar.** Dark red.

**Palet.** Vermilion with large lavender purple blotch.

**Snow Princess.** A very fine white.

**Large 1½"-2" Size Bulbs.**

10 Bulbs of any one variety, 80c.

5 Bulbs each of the above 6 varieties, 30 Bulbs in all, only \$2.20.

### GIANT-FLOWERED

## Tuberous Rooted Begonias

Imported from Belgium

Double Camelia Flowering

Begonias are perhaps the handsomest of all summer-flowering plants. They are very popular for planting in beds or groups in moist, shaded areas. They thrive best in soil containing 50% leaf mold. They bloom from July until frost.

Brilliant, full double, giant flowers which resemble camellias.

Copper Scarlet	White Salmon	Orange Yellow	Pink Crimson

**Large 1½"-2" Size Bulbs.**

Mixed colors, 5 for 90c; 25 for \$4.00. Potted Plants in May at 60c each.

## Gloxinia

They can be planted from February until late May for a succession of bloom. Place one bulb in a 5-inch pot filled with good rich sandy loam, water sparingly and place at once in a sunny window or conservatory.

**Large 1½"-2" Size Bulbs**

Vaughan's Finest Mixed Colors

3 for \$1.10; 10 for \$3.00. Potted Plants in May at 75c ea.

Plant GLADIOLUS for Summer Bloom.

### VAUGHAN'S FANCY-LEAVED

## Caladiums

Showy foliage plants with variegated leaves. Marvelous pot plants that do well in shady window boxes or in outdoor beds in semi-shady positions.

If cut and put in bowls or vases, the leaves make most effective and attractive table decorations.

Best if started in pots, one bulb to a 6-inch pot.

Vaughan's Choice Mixture. 1½"-2" diameter.

Caladium candidum. White with green veins.

35c ea.; 10 for \$3.20; 25 for \$7.50.

\$2.50 each; 3 or more \$2.20 each

**ORDER EARLY.** Don't delay! Send your order today and be confident of receiving the finest Roses in America.

## CULTURE OF ROSES FOR BEST RESULTS

Roses prefer a good garden loam with a plentiful supply of organic matter incorporated. Soils of this nature retain moisture well and roses like plenty of moisture but resent wet feet. Provide for drainage if the rose bed is located where water does not drain readily.

If soil is hard or drainage poor dig out the rose bed to a depth of 2 feet and fill the bed with a few inches of stone in the bottom for drainage and cover the stones with fertile soil incorporated with 10% Peat Moss. Tamp back-fill firmly until hole is half-refilled, FLOOD WITH WATER. After back-filling use 2 tablespoons of G&O Rose Food on the surface, never at the roots.

Complete all-purpose Rose Spray. Offers the first definite mildew and black spot control. Combining an insecticide it kills all insects, including sucking and leaf-eating types.

# HARDY CHRYSANTHEMUMS

## LOVELY HARDY CHRYSANTHEMUMS KNOWN AS HARDY GARDEN MUMS

No perennial has increased in popularity as rapidly as has the "Hardy Garden Mums" producing as they do, hundreds of brilliant blooms at so little a cost. They crown the Fall flower season, and your summer gardening efforts go out in a blaze of glory.

### CULTURE

They thrive in any good garden soil and need little care other than guarding against insects, and applying a straw mulch in the late Fall for winter protection. To grow nice stocky plants, pinch the terminal shoots once or twice during the season to keep the plants sturdy and bushy. First pinching when the plant is 6 inches tall to induce lateral branches. When the lateral branches are 8 inches high, their tips may be pinched out again to produce more branches. Discontinue pinching by July 15th. The very early blooming varieties should not be pinched after July 10th. A well pinched or topped plant will grow strong and sturdy needing no staking and bloom abundantly. Avoid planting them in a shady location.

Strong plants from pots ready for delivery May 1st through June.

On order for \$5.00 or more, postage prepaid. Orders for less than \$5.00, please add 40c for packing and postage.

### Large Early Flowering Chrysanthemums

#### Garden and Greenhouse Large-Flowering Type.

Each year we have more requests for the large greenhouse type chrysanthemums. These are not as hardy as the garden type mums but can be carried over winter very successfully in a cold frame under glass. To produce those big 5-6 inch blooms they require disbudding, leaving one to three flowers to each plant.

We offer only the choicest early varieties:

They are the earliest large flowering type suitable for garden planting, and they are safest planted where they can be protected in case of an early frost.

# For the Finest Quality Lawn

*Sow*

Barr's

# Quality Lawn Seed

Barr's Lawn Grass Seed Mixtures have been designed primarily to produce a lawn that is at once permanent, quick starting, and a good green color. They are guaranteed to be entirely free of Fall or Crab Grass seed. Recleaned by modern machinery. Barr's Lawn Grass Seed Mixtures are free from chaff, which makes these mixtures go twice as far. They test especially high in germination, providing a thick stand from the beginning which is essential in holding weeds in check.

One pound of seed will sow to 200 square feet of lawn. Keep ground constantly moist until grass is well started then water heavily at intervals during dry periods.

## BARR'S SUNNYSIDE Finest Lawn Seed Mixture

This is a combination of the most desirable permanent grasses—dwarf, close-growing, fine-leaved—producing a good green lawn even in dry weather. As the chief ingredient of a good lawn is superfine Kentucky Blue Grass there is a large proportion of this ideal grass in this mixture. No Timothy nor Rye nor coarse-bladed annual grasses are used to cheapen this mixture. It will germinate quickly and provide a neat, permanent lawn. Besides the Kentucky Blue Grass other varieties included are fine leaved perennial grasses and some Chewing's Fescue, a higher-priced grass that holds weeds in check much better than other varieties.

1 lb., \$1.50; 5 lbs., \$7.05; 10 lbs., \$13.20;  
25 lbs., \$30.65; 100 lbs., \$112.00 Prepaid.

## BARR'S FANCY WHITE Dutch Clover

Fancy recleaned seed. Excellent for lawns. Mix 2 to 4 ounces with each pound of above named mixtures if you want Clover on the lawn.

1/4 lb., 65c; 1/2 lb., 95c; 1 lb., \$1.70

## BARR'S GREEN MANTLE Lawn Seed Mixture

This is a splendid mixture of good grasses for average conditions of soil and sunshine. It has a large proportion of Kentucky Blue Grass; also other desirable grasses for a good, quick effect which helps to hold weeds in check. Will give the lawn an enduring velvety, deep green mantle. Very free from weed seeds.

1 lb., \$1.30; 5 lbs., \$6.10; 10 lbs., \$11.40;  
25 lbs., \$26.50; 100 lbs., \$95.00 Prepaid.

## BARR'S FINEST SHADY SIDE Lawn Seed Mixture

Composed of shade-loving permanent varieties of fine-leaved grasses—no Timothy nor Ryegrass. Included are fine-leaved perennial grasses, which have proved best adapted for situations of a difficult nature due to shade.

1 lb., \$1.35; 5 lbs., \$6.35; 10 lbs., \$11.90;  
25 lbs., \$27.75; 100 lbs., \$100.00 Prepaid.

Feed lawns under trees heavily two times a year—spring and early fall. Failure under trees is due more to competition of tree roots than shade. Special Lawn Fertilizer. See page 33.

## YOU GET BEAUTY AND VIGOR IN "WILL GROW" EVERGREENS

Barr's "Will Grow" Evergreens have a character all their own, due to our system of shaping, root-pruning and frequent transplanting, which results not only in a close, beautiful, compact growth so desirable in Evergreens, but aids in a quick recovery after transplanting.

Being hand-dug B-B (Balled & Burlapped) when your order is received all roots are carefully secured. Taken fresh from the ground is assurance that your Evergreens will have their full vitality and that you can count on them giving you the most satisfactory results.

# YEW S (Taxus)

## IMMUNE TO MOST INSECTS AND DISEASES

Adaptability to part shade, semi-dwarf habit, handsome, dark green foliage winter and summer, give the Yews their high value as Evergreens for foundation and other ornamental planting. Best evergreen family for difficult city conditions and foundation planting. Any planting can be greatly enriched by a liberal use of Yews. Many of the Yews produce a profusion of red berries during the Fall.

# HEMLOCK (Tsuga)

## HEMLOCKS — A Leading Specialty at Barr's

The Hemlock with its graceful branches, and beautiful, neat, needle foliage can well be made the basis of many fine plantings. Its informality of outline is particularly pleasing. On the open lawn it makes a handsome specimen, but wherever planted it is never out of place. Will remain small many years if sheared regularly.

### *TSUGA canadensis, 60-80 ft.*

#### Canada Hemlock

The soft, feathery, dark green, fernlike foliage of the Canada Hemlock will give a softening touch to any planting, and combined with its gracefully spreading branches makes of it a magnificent tree. It is the State Tree of Pennsylvania. For specimen planting or in groups on the open lawn, or for hedges.

#### When Building A New Home

It is advisable to budget 5 to 10 percent for landscaping. Real estate men agree an investment of 10 percent of the cost of the house in Evergreens, Trees, and Shrubs increases the value at least 15 percent and your enjoyment of your home to an immeasurable extent for many years to come.

At the very beginning of operations put aside the amount you propose spending for landscaping. Without good landscaping a house gives the appearance of "something wanting," or not being finished.

We shall be pleased to furnish estimates and sketches on contemplated plantings without cost. Our 64 years experience is yours for the asking.

## When and How to Plant Evergreens

- Dig hole 6 inches larger and deeper than ball of earth.
- 3 Then water and fill in remaining soil.

Evergreens transplant best during the Spring months, before and just as new growth is beginning, or for several months following August 15 when the new growth is completed and has become sufficiently hardened.

The excavation for planting should be considerably larger and deeper than the encased roots so as to allow liberal space around the ball for filling in with rich soil. Do not remove burlap, only loosen it at top and roll back as indicated in illustration. Carefully pack soil under earth ball. Tamp back-fill firmly until hole is half-refilled, FLOOD WITH WATER. Mix 10% Peat Moss in the soil used for back fill, and 1/8 lb. Vigoro, or Agrico on the surface after planting, never at the roots.

In restoring the remainder of the excavated soil allow a shallow basin to remain around the tree to collect the rain and enable it to soak into the ground. Mulch with well-rotted manure or Peat Moss to conserve the moisture in the ground and keep it from becoming hard. In the Fall mound the soil against the plants.

Nightly spray the foliage, water soil weekly and direct a STRONG force of water against the under side of the foliage, when the sun is not shining. This treatment preserves the vigor and beauty of the plant.

# SHADE AND FLOWERING TREES

Figures following names indicate approximate height at maturity. "CAL." means thickness of trunk 4 to 12 inches from ground. All trees are dug bare rooted, unless noted "B&B", balled and burlapped. Figures following names or description refers to ultimate height. For best results, it is to your advantage to plant B&B trees where indicated at the small added cost.

## How to Plant and Prune Ornamental Shrubs

### INFORMATION

Remove about one-third of top growth of shrub at planting time if Spring planted, or following Spring, if Fall planted, to facilitate establishment of plant. Thereafter, pruning should be done to remove old wood and keep plant to size desired. Cut off damaged or frayed roots just above the point affected. Be careful to have roots exposed to air or sun as little as possible at any time.

The important point in planting is to have the hole large enough to accommodate the roots without crowding, and to get the soil well worked in among the roots. Space the larger growing Shrubs 5-6 ft. apart, medium growers 4 ft., low growers, 3 ft.

Always water abundantly and apply a mulch. A basin-shaped depression should remain around each plant to hold the water, at least the first summer.

## Evergreen Ground Cover Plants For Difficult Shady Places

## PACHYSANDRA (Spurge)

Under trees Pachysandra is the real answer to the problem of covering the bare ground with greenery. Another advantage is the protection to the roots of trees afforded by the Pachysandra. The glossy foliage is very attractive. Use 2 plants to a sq. ft. of the area to be covered.

# BARR'S FRUIT TREES . . . Are Sturdy Heavy Yielding

The trees listed here are the best in their respective varieties. They are the largest sizes that can be planted to best advantage, are straight trunked, true to name. By reason of their being northern grown they have unusual vigor, will transplant successfully, make good growth, and give an early and abundant yield. Plant cherry tree tap-root straight down.

Heavy, No. 1 grade selected trees; note large caliper (trunk diameter) of trees supplied.
